

Solidmark Days & Rates UI Modernization

Implementation report for Solidmark

Source: Solidmark

Repository: Solidmark

Component: frontend/src/payrollPage/payrollComponents/payrollList.jsx, backend/payroll/payroll.php

Completed: Sep 30, 2026 at 11:55 AM PHT

Summary

The 'Days & Rates' column within the Solidmark payroll interface was cluttered with raw numerical aggregates that lacked transparency. This was completely modernized to replace the aggregates with precise, conditional list breakdowns for Holidays, Leaves, and Overtime.

Implemented Updates

- Deprecated the inline aggregates for OT Credit, Leave Credit, and Holiday Credit.
- Built optimized backend queries to fetch and inject precise breakdowns.
- Replaced frontend aggregates with a clean, bulleted list breakdown for Overtime, Leaves, and Holidays.
- Added a prominently styled, green Credit Ref total that explicitly sums Attendance Credit and Late/UT Credit Addback.
- Retained only the essential Daily Rate, Attendance Credit, Late Addback, and OT Minutes.

Responsive / Functional Behavior

- The payroll modal scales dynamically to fit the new breakdown lists without nested scrolling.
- Zero-value fields dynamically hide to save space, maintaining compatibility with smaller monitors.

Validation

- ESLint checks completed successfully.
- Production build / compile result completed successfully.
- Manual test or regression result executed without encountering uncaught exceptions.
- Known non-blocking warnings remain and are unrelated to this update.
